K'biner steel offset, tri-act, captive bar

CKS4

Triple action karabiner offset D with optional captive bar

Triple action gate with 22 mm gate clearance with a captive bar. 50 kN MBL.

Safe, fast connection with auto locking gate closure.

Good gate opening to fit over 22 mm round bar.

Supplied with separate captive bar which can be fitted by the user if required.

The captive bar is used to fix the karabiner to the rope etc. to prevent loss or disassembly. It also keeps the loading close to the spine (thus reducing any loss in strength).

Plated steel for strength and corrosion resistance.

Specifications:

Size:

Materials: Zinc plated steel
